

## SELECTING YOUR ROOFLIGHT

<b>Construction:</b>	Purpose designed, thermally de-coupled aluminium with high quality powder coat finish, "Perspective" Rooflights are designed to combine modern, low maintenance materials, with traditional & authentic appearance of timber.
➤	See "The Perspective Glazed Roof System" page.
➤	Contemporary designs can be achieved where timber appearance feature detailing is not required.
<b>Colours:</b>	Standard colour white, with any RAL colour being available as an optional extra
<b>Glazing:</b>	4:16:4 clear, toughened, soft-coat low 'e', argon filled sealed units.
➤	Other glazing can be specified as an optional extra.
<b>Prices:</b>	A price <u>guide</u> is available on our website, which gives an accurate guide to a range of sizes.

**Delivery & Installation:** Prices are available on application.

**ROOFLIGHT:** For fixing to a horizontally level kerb, prepared for the purpose, with guttering, opening vents & ridge decoration options.

**Hip ended** (typical)

**Gable ended** (typical)

**Monopitch** (typical)

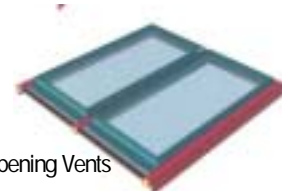

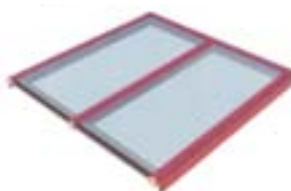

**NOTE:** You may wish to discuss your size requirement with us prior to committing to a specific aperture size, as this can have an effect on the aesthetics of the final appearance of your Rooflight.

**CLERESTOREY:** Vertical glazed section beneath the roof - usually at 400mm height, for which opening sashes can be specified.

**LAYLIGHT:**

- No built in pitch, designed to fit on a suitable prepared kerb, with a pitch from 5 - 45 degrees.
- Perimeter skirt flashings project beneath your kerb for weather protection.

With Opening Vents

➤ This information is intended as guidance to the more popular types of design, and a wide range of examples are shown on our web site pages.

➤ Other bespoke designs, including opening roof options are available
