

SELECTING YOUR ROOFLIGHT

Construction:	Purpose designed, thermally de-coupled aluminium with high quality powder coat finish, “Perspective” Rooflights are designed to combine modern, low maintenance materials, with traditional & authentic appearance of timber. See “The Perspective Glazed Roof System” page.
	Contemporary designs can be achieved where timber appearance feature detailing is not required.
Colours:	Standard colour white, with any RAL colour being available as an optional extra
Glazing:	4:16:4 clear, toughened, soft-coat low ‘e’, argon filled sealed units. Other glazing can be specified as an optional extra.
Prices:	A price <u>guide</u> is available on our website, which gives an accurate guide to a range of sizes.
Delivery & Installation:	Prices are available on application.

ROOFLIGHT: For fixing to a horizontally level kerb, prepared for the purpose, with guttering, opening vents & ridge decoration options.

<u>Hip ended</u> (typical)	<u>Gable ended</u> (typical)	<u>Monopitch</u> (typical)
		

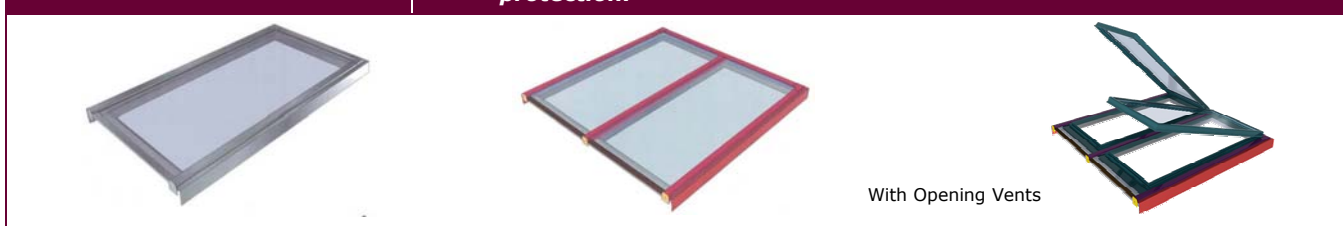

NOTE: You may wish to discuss your size requirement with us prior to committing to a specific aperture size, as this can have an effect on the aesthetics of the final appearance of your Rooflight.

CLERESTOREY: Vertical glazed section beneath the roof - usually at 400mm height, for which opening sashes can be specified.

LAYLIGHT:

- No built in pitch, designed to fit on a suitable prepared kerb, with a pitch from 5 - 45 degrees.
- Perimeter skirt flashings project beneath your kerb for weather protection.

This information is intended as guidance to the more popular types of design, and a wide range of examples are shown on our web site pages.

Other bespoke desgns, including opening roof options are available
